LID FASTENING STYLES

Worm Gear

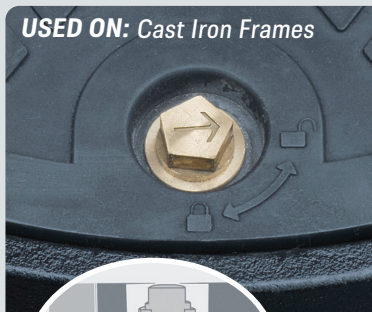

Worm gear locks to shelf on frame. Cast iron or polymer.

Bolt-Down Style

Our Frame and Cover Assemblies have threaded inserts in the frame to accept stainless screws (see page 31 & 33) or optional security screws (see page 40).

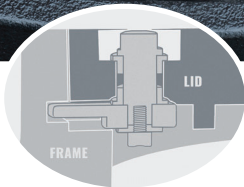

SECURITY SCREW

USED ON: Cast Iron Frames

OPEN

LOCKED

USED ON: Matching Composite Frames and Covers

OPEN

LOCKED

Quarter-Turn Double Paddle Lock Style

Two paddles on opposite sides of the lid lock into slots in frame. Also offered as an alternative to bolt-down style Frame and Cover Assemblies.

REDUCING RINGS

Fabricated Reducing Rings

are customized to permit a standard lid size to fit a non-standard frame size. Ideal when time constraints or small quantities make a new mold impractical.

For dimensions, load ratings and additional options, refer to the product information chart on pages 18 - 28.
