30"	30.00	32.00	31.74	32.74
36"	36.00	38.30	37.96	39.16

*…or you can choose to customize this side instead!*
(add $1.50 per tape)

Diameter Tape Features

- Blade dimensions are 1/4″ x 10′
- A necessity for any water utility or waterline contractor! Know your pipe diameters in order to size your clamps, couplings and tapping sleeves accurately! Gift Boxed.

Linear Markings

1 INCHES 2

First 12 inches of front measures to 1/32nds. Balance of front measures to 1/16ths.

Diameter Markings

DIA. INCHES TO 100THS.   1|0 2|0 3|0 4|0 5|0 6|0 7|

Diameter on back to 100ths of inches.

Note Concerning Your Logo:

We need you to supply a copy of your logo that conforms to our artwork requirements, as shown on the back side of this flyer, in order to ensure the best quality possible.

ORDERING IS EASY!
Just follow these steps:

1 Contact a Trumbull Sales Rep shown below to set up your order.

Sharon Palo:
330.393.1293
spalo@trumbull.com

Diane Rogers:
330.270.7878
drogers@trumbull.com

2 Review the artwork requirements shown on the back of this flyer.

3 Send qualifying logo file to:

Michael Hevener:
mohevener@trumbull.com

Requirements for OD Tape Artwork

When you send us your logo together with the contact information you want on your label, we are happy to design a label for you. We will always send you a proof for you to review and approve before we send anything to the printer. If you want changes made after you review the proof we could make them for you, however if you send us the final artwork for your label, you are responsible for making any changes or corrections to the art and for sending us the revised art.

There are some requirements for the OD Tape artwork that should be followed to ensure the best possible end product. These requirements are a result of the nature of the print media, which are more demanding than those of Website art requirements. We hope you understand, but at the same time we are confident that you will be happy with the quality of your labels if you adhere to the requirements.

1. *Logo must be at least 2" wide if your logo is horizontal, or 2" tall if logo vertical*

2. *Logo must be at least 300 "DPI" (dots per inch) or larger.*

3. *Logo can be created as any of the following image formats: EPS, TIF, JPG or PDF*

EPS Images

This is the best format to send your images. If you artwork is created as a "vector" image in Adobe Illustrator, you will have a crisp, clear image on your labels. However, if you place a non-vector image in Adobe Illustrator, it won't make a difference. This only applies to images created within the Illustrator software itself.

TIF Images

Images created in photo software such as Adobe Photoshop are good, as long as they are 300 DPI or larger at the size that will be used to print (2″ tall or 2″ wide, as detailed above).

JPG Images

These files are acceptable as long as they are 300 DPI or larger. However, many customers have sent us JPG images taken from their Websites. Unfortunately, these will not work because such images are created at a lower image size than what we need. If you are unsure if your JPG file is usable, please ask your Webmaster or Marketing Department about the image's size, or if perhaps they have a larger image to send.

PDF Files

We have found that there are times that we could accept a PDF File, but as with all the other formats we require that the image that is placed into your PDF file is 300 DPI or larger (or an Adobe Illustrator vector file). Also it is important that the PDF file is created at the "Press Quality" setting. These settings sometimes cause confusion. For this reason we ask that you send your file as one of the other formats if possible.
